Dynamic Datacenter Collection

FERRANTI
computer systems

tailored to your needs

Ferranti-M

**Simplify and
automate your
IT management
operations.**

It is time to transform
your datacenter!

For this solution we work
with these partners:

Microsoft

For whom is this the recommended solution?

Your company has 50 to 249 IT end users who are supported by a small IT department? There is a data center available at your location but its management is not a priority for the IT team? Several internal processes are extremely crucial for the company and should be able to rely on a reliable and flexible system, without extreme complexity. You rely on an external partner for the development and eventually managing your data center solution?

Did you answer YES?

Then our Ferranti-M all-in-one data center solution, could be a perfect fit for you!

Advantages

- > **Flexibility:** This solution is based on the goals of your company. You can simply let your datacenter solution evolve with you when the goals and business needs change.
- > **Cost efficient:** State-of-the-art hardware is not always the one and only correct answer to your needs, we look for you at the right balance between cost and performance so you do not pay too much.
- > **Reliability:** The M-solution consists of thoroughly proven technology.
- > **Continuity:** Enjoy uninterrupted connectivity and continuity of your business processes through the built-in redundancy.
- > **Scalability:** Support the company's growth. Thanks to the flexible structure of the solution, it can easily be expanded when need to add a large amount of new users to the system.
- > **Modular Architecture:** The functionality is expandable when needed, thanks to the possibility to add extra modules or to replace modules.
- > **Delivery Speed:** There is only a minimum of manual fine tuning required. That will allow for the delivery of a Ferranti-M datacenter solution in no time.
