

# A NEW DEFINITION OF OFFICE CONNECTIVITY: MEET THE **FERRANTI-X BORDERLESS NETWORKS SOLUTION**

**tailored to your needs**

## Borderless Networks Collection

**FERRANTI**  
computer systems

## Ferranti-X

**A manageable  
and transparent  
network for small  
businesses.**

Designed for  
businesses of today  
and tomorrow.

For this solution we  
work with these partners:

For whom is this the perfect solution?

Your business has fewer than 50 workstations? The ICT manager performs all operations him- or herself or sources them out? Can you identify with the business needs of: Accounting Offices, School clusters, Construction companies, Municipalities, Social services or Automobile concessionaires? Do you have a very predictable ICT usage? Is technical support during business hours sufficient?

### Did you answer YES?

Then our Ferranti-X borderless networks solution could be a perfect fit for you!

### Advantages

- > **Simplicity:** You have Plug&play expansion capabilities through the cloud network architecture.
- > **Consolidation:** One platform for monitoring all end-user communications so you get a clear overview and insight.
- > **Manageability:** Self-configuring and self-optimizing hardware ensures that the configuration of your network will run automatically for the biggest part.
- > **Office use:** Via integrated and automated application control you get a clear picture of the network and applications usage on a user level.
- > **Affordable:** Choose this cost-effective solution that covers at least 80% of the functionality you require.
- > **Performance:** The latest technologies are used to achieve optimum performance and efficiency.
- > **Security:** Built for today's and tomorrow's businesses.

# Ferranti-X

## CLIENT ACCESS

1G backbone network

Redundant path for access switches

PoE Optional

High visibility into users, their devices, applications and network usage

Network Access Control compatible (802.1X protocol)

Validated configuration templates (Security hardened)

## WIRELESS ACCESS

Fast and reliable wireless connectivity (802.11n)

Automatic mesh deployment

High visibility into users, their devices, applications and network usage

Easy to deploy access control and bandwidth limitations

Network Access Control compatible (802.1X protocol)

Validated configuration templates (Security hardened)

## SECURITY

Statefull Firewall

Client/Site to site VPN

Network Address Translations

Radius / Active Directory Integration

Web Protection Optional

Application Firewalling Optional (service publishing)

Endpoint Protection Optional

Network Access Control Optional

IPS Optional

## ROUTING

LAN Routing

General redundancy protocol

## CLOUD CONNECTIVITY

Dynamic multi-site WAN routing Optional

Dedicated Cloud Connectivity Optional

## SUPPORT

ITMO MANAGED MONITORING | ITMO EXPERT SUPPORT | ITMO MANAGED SERVICES

### When will it be more interesting to opt for the Ferranti-2X solution?

- > 10 Gbit connectivity required
- > Over 14 fiber connection per core switch are required
